Price/Book	0.4X	Price/Earnings (2009)E	4.3X

* Includes \$2.387 million gain from non-refundable maintenance reserves

AeroCentury Corp., is engaged in the business of ownership, management, leasing and acquisition of aircraft. The primary focus is on used commercial turboprop aircraft equipment for lease to foreign and domestic regional air carriers.

Key investment considerations:

We are maintaining our Speculative Buy rating on the shares of AeroCentury (AMEX: ACY); however, we are reducing slightly our twelve-month price target to \$14.35 per share from \$17.85 per share. Our price target is based on our operating lease revenue and earnings per share estimates over the next four quarters and a relative analysis of price to sales and earnings for the Rental & Leasing Industry.

On May 12, 2008, ACY reported first quarter 2008 total revenue of \$7.823 million versus \$5.118 million. Net income for the quarter was \$0.296 million or \$0.18 per diluted share versus net income of \$1.024 million or \$0.66 per share in the same period last year.

Investors should note that the Company is required to borrow an additional \$18 million under its subordinated notes financing (on or before June 30, 2008). The subordinated notes bear fixed interest of 16% per annum immediately upon issuance; therefore, an important factor in the Company's near-and mid-term results will be its ability to expediently locate and acquire additional assets utilizing these funds.

Based on comments in ACY's first quarter 10Q filing, recent operating lease revenue trends, and the expectation of increased interest expense during the second half of 2008, we are adjusting our forecasts. For 2008, our total revenue estimate is \$29.368 million (prior was \$25.225 million) and net income estimate is \$2.911 million or \$1.79 per diluted share (prior was \$1.985 million or \$1.22 per diluted share).

Our initial forecast for 2009 calls for total revenue of \$29.450 million and net income of \$3.050 million or \$1.87 per diluted share, which is based on current operational trends and a full year of higher interest expense. Investors should note that our current forecast does not include the purchase of additional aircraft until such time as a purchase is announced. The purchase of aircraft should increase operating lease revenue over time.

The Company

AeroCentury Corp. (AMEX: ACY), based in Burlingame, California, was formed in 1997. ACY is engaged in the business of ownership, management, leasing, and acquisition of turboprop aircraft and engines. The primary focus is on used commercial turboprop aircraft equipment for lease to foreign and domestic regional air carriers.

The business is managed by JetFleet Management Corp., pursuant to a management agreement between ACY and JetFleet Management (an integrated aircraft management, marketing and financing business and a subsidiary of JetFleet Holding Corp.). Investors should note that certain officers of ACY are also officers of JetFleet Management and JetFleet Holding and hold significant ownership positions in those entities.

The Company's mission is to increase stockholder value by acquiring aircraft assets and managing those assets in order to provide a return on investment through lease revenue and the eventual sale of the asset. Management believes it can achieve the Company's mission by reinvesting cash flow, as well as successfully executing on asset selection, lessee selection, and obtaining acquisition financing.

Assets are acquired in one of three ways:

- Purchase of an asset that is already subject to a lease; thereby assuming the rights and obligations of the seller, as lessor under the existing lease;
- Purchase of an asset from an air carrier and leaseback to that seller; and
- Purchase of an asset from a seller and then immediately enter into a new lease for the aircraft with a third party lessee. According to the Company, in this case it typically does not purchase an asset unless a potential lessee has been identified and has committed to lease the aircraft.

Investors should be aware that the Company generally targets used regional aircraft and engines with purchase prices between \$1 million and \$10 million, and lease terms less than five years. Also, in order to improve the remarketing-ability of an aircraft after expiration of the lease, the Company focuses on having lease provisions for its aircraft that contain maintenance payments and return conditions (such that when the lessee returns the aircraft, the Company receives the aircraft in a condition that allows for it to re-leased or sold in a timely fashion). In addition, the Company examines the creditworthiness of a potential lessee (in terms of their short- and long-term growth prospects, financial status, as well as the impact of pending regulation or de-regulation of the lessee's market).

Of note, as of March 31, 2008, all but three of the Company's 41 aircraft were on lease. Also, one turboprop engine owned by ACY was off lease. At the end of first quarter, two of the three aircraft off lease were Saab 340As. These two aircraft came off lease as a result of the Company agreeing to their early return (the leases were set to expire in May and July 2008). Management is seeking re-lease or sale opportunities for these aircraft. Also, one deHavilland DHC-8-300 aircraft was off lease and re-lease opportunities are being sought by Management.

Recent Developments

- During April 2008, the Company repaid the outstanding principal owed by AeroCentury V LLC under its special purpose financing. The intent of the transaction is to transfer ownership of the two aircraft that served as collateral for the financing from AeroCentury V LLC to AeroCentury Corp., upon which the aircraft will be eligible as collateral under its credit facility. Additionally, the leases for the two aircraft have been extended for two years to May 2010.
- On May 1, 2008, the stockholders of ACY approved an amendment to the Company's Amended and Restated Certificate of Incorporation to increase the number of authorized shares of common stock from 3 million shares to 10 million shares. On May 6, 2008, the Company filed the amendment with the Delaware Secretary of State.

- During December 2007, the Company entered into a \$20 million interest rate swap, under which ACY committed to make or receive a net settlement for the difference in interest receivable computed monthly on the basis of 30-day LIBOR and interest payable monthly on the basis of a fixed rate of 4.04% per annum.

Recent Financials

On May 12, 2008, ACY reported first quarter 2008 total revenue of \$7.823 million versus \$5.118 million in the same period last year. Investors should be cognizant that both periods reflect the adoption of AUG AIR-1, Accounting for Planned Major Maintenance Activities (the period last year was restated to conform to current period results).

Operating lease revenue in the first quarter of 2008, improved to \$5.894 million versus \$4.283 million in the same period last year. The positive change in operating lease revenue (\$1.611 million) versus the same period last year was primarily due to aircraft purchased during 2007, as well as re-leases during 2007 at increased rental rates for several aircraft. Mitigating the operating lease revenue increase was aircraft off lease during the first quarter of 2008.

Maintenance reserves income revenue (introduced as a line item during the first quarter of 2007 – with corresponding restatements for 2006) resulted from the adoption of AUG AIR-1. On a year-over-year basis, it increased to \$1.750 million from \$0.827 million in the first quarter of 2007. The increase resulted from the acquisition of aircraft in 2007. **Management continues to believe that this revenue line item is likely to make overall results more volatile.**

ACY reported that depreciation, management fees, G&A, insurance expenses, and bad debt for the quarter increased by approximately \$0.846 million versus the first quarter of 2007. The increase was primarily due to higher depreciation, management fees, as well as general and administrative expenses. Depreciation increased by approximately \$0.472 million, primarily due to the purchase of aircraft during 2007. Management fees increased by approximately \$0.200 million due to higher net book values as a result of aircraft acquisitions (of note, these fees are calculated on the net book value of the aircraft owned by the Company), which was offset to some degree by the effect of depreciation on the net book value of the Company's aircraft. G&A, insurance and bad debt expenses increased by approximately \$0.174 million primarily from additional costs incurred in connection with the audit of the Company's 2007 financial statements, as well as Officer and Director insurance fees, and product liability insurance and insurance for off-lease aircraft and aircraft engines.

Interest expense increased by approximately \$0.908 million in the first quarter of 2008 compared to the same period last year. Higher interest expense resulted from the change in fair value of the Company's interest swap entered into during December 2007, as well as increased average outstanding debt balances during the quarter compared to the first quarter of 2007.

Maintenance expenses increased by approximately \$2.156 million in the first quarter of 2008 compared to the first quarter last year. According to the Company's 2008 10Q filing, operations are dependent on the aggregate amount of the maintenance claims submitted by lessees for reimbursement and expenses incurred in connection with off-lease aircraft; therefore, the increase resulted from higher total lessee claims.

In comparison, Taglich Brothers' estimates called for total revenue of \$6.250 million and net loss of \$0.275 million or (\$0.17) per share. Actual results differed from our estimates primarily due to the line item of maintenance reserves income.

Balance Sheet as of March 31, 2008

The Company provided the following balance sheet data:

- Total assets were \$127.645 million versus \$126.653 million at December 31, 2007;
- Total liabilities were \$95.210 million versus \$94.513 million at December 31, 2007; and
- Shareholders' equity stood at \$32.435 million versus \$32.140 million at December 31, 2007.

The Company ended the first quarter of 2008 with cash and cash equivalents of \$5.539 million versus \$2.843 million at December 31, 2007. Total outstanding notes payable and accrued interest increased to \$71.731 million versus \$73.075 million at the end of 2007.

At the end of the quarter, the Company had outstanding \$58.096 million under its \$80 million senior revolving credit facility (the maturity date of the facility is March 31, 2010). Investors should note that the potential exists to increase the maximum amount available under the revolving credit facility to \$110 million. According to the first quarter 2008 10Q filing, the weighted average interest rate on the facility at March 31, 2008 and 2007 was 5.56% and 8.38%, respectively. During the first quarter of 2008, the Company repaid \$1.5 million of the outstanding principal under its credit facility and was in compliance with all covenants under its credit facility.

Also in April 2007, the ACY entered into a Securities Purchase Agreement (SPA), which allowed for the issuance of 16% senior unsecured subordinated notes, with an aggregate principal amount of up to \$28 million. The subordinated notes will be due December 30, 2011. On April 17, 2007 (the closing date), \$10 million of the notes were sold at 99% of the face amount. Any notes issued for the remaining \$18 million will be sold at 99% of the face amount, at subsequent closings expected to occur on or before June 30, 2008. As of March 31, 2008, the carrying amount of the notes was approximately \$7.679 million (outstanding principal amount of \$10 million less unamortized debt discount of approximately \$2.321 million), accrued interest payable of was zero. According to the 10Q filing, the Company was in compliance with all covenants under the SPA.

During December 2007, the Company entered into a \$20 million interest rate swap, under which ACY committed to make or receive a net settlement for the difference in interest receivable computed monthly on the basis of 30-day LIBOR and interest payable monthly on the basis of a fixed rate of 4.04% per annum. The swap is designed to economically hedge \$20 million of the Company's interest rate exposure over its term (two years) by fixing the net interest payable over the period. At March 31, 2008, the Company recognized a \$0.621 million liability for the swap on its balance sheet (in the notes payable and accrued interest line item). The Company also recognized both a net settlement amount of \$0.014 and a loss of \$0.471 million for the first quarter of 2008 as a component of interest expense. **If short-term interest rates continue to decline, the Company will incur additional interest expense as a result of the swap.**

Investors should be aware that during November 2005, the Company refinanced two DHC-8 aircraft that were part of its credit facility collateral base, using bank financing separate from its credit facility. The aircraft were transferred to AeroCentury V LLC, a special purpose LLC, which borrowed \$6.4 million at a fixed interest rate of 7.87% and is due November 10, 2008. The note is collateralized by the aircraft of this new non-recourse subsidiary (which means that if a default were to occur it would not impact ACY's base business). Repayments of this financing consists of monthly principal and interest payments through April 22, 2008, interest only from April 22, 2008 until the maturity date, and a balloon principal payment due at maturity. According to the first quarter 2008 10Q filing, the balance of the note payable at March 31, 2008 was \$4.198 million and ACY was in compliance with all covenants related to this obligation.

In April 2006, the Company refinanced a note obligation for an aircraft previously owned by AeroCentury II LLC, using bank financing from another lender. The aircraft was transferred to AeroCentury VI LLC, a special purpose LLC, which borrowed \$1.650 million due October 15, 2009. The note bears interest at an adjustable rate of one-month LIBOR plus 3%. The note is collateralized by the aircraft and the Company's interest in AeroCentury VI LLC. Payments due under the note consist of monthly principal and interest through April 20, 2009, interest only from April 20, 2009 until the maturity date, and a balloon principal payment due on the maturity date. If the aircraft lease agreement is terminated on April 15, 2008 pursuant to a lessee early termination option, the note will be due October 15, 2008, and the interest only period will be from April 20, 2008 through October 15, 2008. According to the first quarter 2008 10Q filing, the balance of the note payable at March 31, 2008 was \$1.024 million and ACY was in compliance with all covenants related to this obligation. **As previously noted in the recent developments section, during April 2008, the Company repaid the outstanding principal owed by AeroCentury V LLC under its special purpose financing.**

Management believes that the Company will have adequate cash flow to meet its ongoing operational needs, including required repayments under its credit facility, obligation under its recently issued subordinated notes, and special purpose financings based upon their own estimates of future revenues and expenditures. Their belief is based on each advance on its credit facility being able to fund a portion of a new acquisition of an asset subject to a lease with the lease revenue expected to be greater than the incremental increase in required for interest payments arising from the advance.

However, future growth will be dependent on the availability of such additional financing for acquisitions of leased assets. We believe based on the Company's history and current financial position that it has enough resources to sustain operation for the foreseeable future.

Competitive Landscape

The Company targets regional commercial aircraft operators that are seeking to lease aircraft under an operating lease. The competition in this market, which is primarily based on price and lease terms, comes from companies that offer financing, including leasing companies, banks and other financial institutions, and aircraft leasing partnerships. The large participants in the aircraft leasing industry include the CIT Group (NYSE: CIT), GE Capital Aviation Services, a subsidiary of General Electric Commercial Finance, Willis Lease Finance Corp. (NasdaqGM: WLFC), AerCap Holdings N.V. (NYSE: AER), and Babcock & Brown Air Limited (NYSE: FLY).

According to the Travel Industry Association of America (TIA), after years of little travel volume growth combined with significantly lower travel spending, 2005 was the year of recovery the industry has been awaiting. It was the first year since 2000 that all travel industry sectors experience increased demand. The TIA is reporting that overall traveler spending by domestic and international visitors increased by 7.0% to \$699.8 billion in 2006, versus \$653.8 billion in 2005. The TIA had estimated that number should have increased by approximately 5.7% in 2007 to \$739.9 billion (actual numbers have not been released yet) and is currently estimated to grow by 5.2% in 2008 to \$778.2 billion and 4.5% in 2009 to \$813.1 billion.

Outlook and Projections

Based on comments in ACY's first quarter 10Q filing, a review of first quarter results, and the expectation of increased interest expense during the second half of 2008 (due to the additional \$18 million of subordinated debt due to occur on or about June 30, 2008), we are revising our forecasts for 2008.

We do believe that supporting our projections for 2008 should be a combination of approximately 41 aircraft and one aircraft engine within its portfolio (as of March 31, 2008). In the Company's 10-K filing, it stated that as of December 31, 2007, minimum future operating lease revenue payments receivable under non-cancelable leases amount to \$20.812 million for 2008.

We are forecasting for 2008, total revenue of \$29.368 million and net income of \$2.911 million or \$1.79 per diluted share. Our prior expectation was for total revenue of \$25.525 million and net income of \$1.985 million or \$1.22 per diluted share. It is important to note that our total revenue estimate for 2008 primarily consists of operating lease revenue and maintenance reserves income, as we are not forecasting any unusual events (sale of aircraft) that might also impact total top line results. Our bottom line expectations have increased from our prior expectations, primarily due to better than anticipated first quarter results due in part to higher operating lease revenue. Investors should note that interest expense will increase during the second half of 2008, due to the issuance of additional subordinated notes (as previously discussed, which the Company will attempt to use to purchase aircraft).

Our initial forecast for 2009 calls for total revenue of \$29.450 million and net income of \$3.050 million or \$1.87 per diluted share, which is based on current operational trends and a full year of higher interest expense. Investors should note that our current forecast does not include the purchase of additional aircraft until such time as a purchase is announced. The purchase of aircraft should increase operating lease revenue in subsequent quarters after the acquisition is completed.

Also, while the current record oil prices may be slowing economic growth and impacting the overall confidence level of business, we believe it should have no measurable impact on ACY's operations. Our belief is based on the ways aircraft are acquired by the Company:

- Purchase of an asset that is already subject to a lease;**
- Purchase of an asset from an air carrier and leaseback to that seller; and**
- Purchase of an asset from a seller and then immediately enter into a new lease for the aircraft with a third party lessee. According to the Company, in this case it typically does not purchase an asset unless a potential lessee has been identified and has committed to lease the aircraft.**

We believe that this provides minimal risk to the Company's operations over the near and intermediate term once an aircraft is purchased. The question becomes the timing of an aircraft acquisition. Until a public announcement is made by the Company, our estimates do not incorporate the purchase of aircraft.

Our bottom line estimates for 2008 and 2009 incorporate the following assumptions:

- Interest expense of \$9.294 million versus \$6.260 million reported in 2007. The increase is primarily the result of the \$10 million subordinated debt issued on April 17, 2007 and additional \$18 million that will be issued on or about June 30, 2008. For 2009, the interest expense trend should continue higher; therefore our estimate is \$10.275 million;
- SG&A expenses, which includes insurance, of approximate \$1.132 million versus \$0.865 million reported in 2007, as well as 2009 expenses of \$1.150 million. Investors should realize if the Company is able to purchase additional aircraft (as noted above), our 2009 expense expectation is likely to be low;
- Management fees and depreciation of \$10.420 million versus \$8.632 million reported in 2007. The increase is primarily due to the Company entering 2008 with a portfolio of 41 aircraft versus entering 2007 with an aircraft portfolio of 36. Until additional aircraft are purchased we anticipate only a slight variation of Management fees and depreciation in 2009 (our forecast is \$10.455 million);
- Maintenance, impairment, and bad debt expenses of \$4.141 million versus \$2.738 million in 2007. The increase is primarily due to expenses the Company recorded in the first quarter of 2008, as a result of the maintenance on aircraft that was returned and needs to be refurbished in order to re-lease. For 2009, we expect this line item to normalize at approximately \$3.0 million; and
- A tax rate of 33.55% in 2008 versus 29.49% as reported in 2007. For 2009, we anticipate a tax rate of approximately 33.26%.

Investors should be aware that one of the Company's aircraft leases expired during the first quarter of 2008. Management is seeking re-lease opportunities for the aircraft. In addition, three of the Company's other leases expire during 2008. The Company believes that it will be successful in extending the leases for these aircraft or be able to re-lease them within an acceptable period after return at lease end. Management also believes that even if the aircraft are off lease for an extended period of time, the Company will be able to remain in compliance with the terms of its credit facility and subordinated notes.

Currently, the Company is closely monitoring the performance of three lessees with a total of four aircraft under lease. The Company continues to work closely with these lessees to ensure compliance with their current obligations. Investors should note that the Company's aircraft are subject to leases with varying expiration dates through January 2012.

As previously described, the Company is required to issue the remaining \$18 million of principal amount of subordinated notes on or before June 30, 2008. The notes bear an annual fixed interest of 16%, as well as a commitment fee on the un-issued balance, an important factor in the Company's near term results will be the

Company's ability to expediently locate and acquire additional assets utilizing these funds. ACY stated in its 2007 10-K filing, in order to optimize its debt financing expense, it will need to acquire sufficient assets on or before June 30, 2008 to enable the utilization of the debt. It is likely that the \$18 million of subordinated notes proceeds will be used for acquisition of additional aircraft assets or to repay a portion of the indebtedness outstanding under its exiting credit facility. Investors should realize that since the Company's credit facility interest rate is likely to continue to be lower than the subordinated notes fixed rate, this would likely result in a higher effective interest rate (as we have incorporated into our model), without a corresponding increase in operating revenue, if additional aircraft is not purchased and subsequently leased (we have not factor any additional aircraft purchases into our model, when the Company announces such a purchase we will revise our model).

Investors should be aware that if additional purchases of aircraft are made (from the expanded credit facility and/or subordinated notes) and the Company is able to re-lease aircraft on a consistent basis, revenues could exceed our expectations for 2008. In general, the specific timing of when aircraft(s) will be returned to the Company remains unclear; however, until an aircraft is returned, rent will be paid by the lessor even if the lease term has expired. In order to obtain re-lease agreements, Management continues to focus its efforts on marketing.

Of note, due to the extremely low share count (1.620 million – which includes the dilutive effect of warrants in the amount of 0.058 million) a \$0.100 million change in net income equals approximately a change of \$0.06 per diluted share.

Risks

Lessee Credit Risk

If a customer defaults upon its lease obligations, the Company may be limited in its ability to enforce remedies since most of its lessees are small regional passenger airlines, which may be even more sensitive to airline industry market conditions than the major airlines. As a result, the Company's inability to collect rent under a lease or to repossess equipment in the event of a default by a lessee could have an adverse impact on the Company's operating lease revenue.

FASB Staff Position AUG AIR-1

The Company discontinued the accrue-in-advance method of accounting for planned major maintenance beginning on January 1, 2007. Under the accrue-in-advance method of accounting, the collection of non-refundable maintenance reserves for planned major maintenance and disbursements from reserves to lessees to pay for maintenance performed was reflected only on the Company's balance sheet. AUG AIR-1 allows major maintenance activities to be accounted for in one of three ways: 1) the built-in overhaul method, 2) the deferral method, or 3) the direct expensing method. Management evaluated the impact of the adoption of this new staff position and determined that, going forward, it will use the direct expensing method, under which actual costs incurred are expensed directly. This requires the accrual of non-refundable maintenance reserves from the Company's lessees for planned major maintenance to be reflected as income and performance of maintenance work in connection with the re-lease of maintenance reserves to be reflected as an expense (when maintenance is actually performed). Since the total amount of maintenance reserves accrued in any given period usually exceeds the amount of maintenance expense, it is likely that the Company's net income under the new accounting method will be higher than it would have been under the previous method. **In addition, because the net effect of income from maintenance reserves and maintenance expense in any given period will vary, it is likely that this accounting method will result in uneven effects on the Company's results of operations.**

Interest Rates

The Company's current credit facility and the indebtedness of one of its special purpose subsidiaries carry a floating interest rate based upon short-term interest rate indices. Also, lease rates typically, but not always, move with interest rates, but market demand for the asset also affects lease rates. Because lease rates are fixed at the origination of leases, interest rate changes during the term of a lease have no effect on existing lease payments. Therefore, if interest rates rise significantly, and there is relatively little lease origination by the Company following such rate increases, the Company could experience lower net income. Further, even if significant lease

origination occurs following such rate increases, if the contemporaneous aircraft market forces result in lower or flat rental rates, the Company could experience lower net income.

The Company has chosen to hedge some, but not all, of its variable interest rate exposure. Consequently, if an interest rate increase were great enough, the Company might not be able to generate sufficient lease revenue to meet its unhedged interest payment and other obligations and comply with the other covenants of its facility or indebtedness of one of its special purpose subsidiaries. Additionally, if the one-month LIBOR rate drops below the fixed swap rate, the Company will be obligated to pay the swap counterparty the difference between the fixed swap rate of 4.04% and the one-month LIBOR rate that is payable under the Company's hedged credit facility obligations. As of May 14, 2008, the one-month LIBOR rate was 2.505%.

Credit Facility

At March 31, 2008, \$58.096 million was outstanding under the Company's \$80 million credit facility, which expires on March 31, 2010. This means that Management has the ability to increase its aircraft portfolio. As of March 31, 2008, according to the Company's first quarter 10Q filing, it was in compliance with all covenants related to this obligation.

Special Purpose Financing

During November 2005, the Company refinanced two DHC-8 aircraft using bank financing separate from its credit facility. The aircraft were transferred to a special purpose LLC, which borrowed \$6.4 million, due November 10, 2008. The note is collateralized by the aircraft. Payments consist of monthly principal and interest through April 22, 2008, and interest only from April 22, 2008 until the maturity date, when a balloon principal payment is due. According to the first quarter 2008 10Q filing, the balance of the note payable at March 31, 2008 was \$4.198 million and ACY was in compliance with all covenants related to this obligation.

In general, the availability of special purpose financing in the future will depend on: 1) the availability of funds to be used for the equity portion of the financing; 2) the type of asset being financed; 3) the creditworthiness of the underlying lessee; and 4) continued compliance with certain of the Company's credit facility covenants.

Debt Financing

During April 2007, the Company entered into a Securities Purchase Agreement (SPA), which allows for the issuance of 16% senior unsecured subordinated notes, with an aggregate principal amount of up to \$28 million. The subordinated notes will be due December 30, 2011. Under the SPA, the note purchasers will also be issued warrants to purchase up to 171,473 shares of the common stock at an exercise price of \$8.75 (subject to registration rights pursuant to an Investor's Registration Rights Agreement).

The Company uses its revolving credit facility, subordinated debt, and special purpose financing to acquire aircraft in order to lease it to a customer. If a customer is unable to make its lease payments, AeroCentury may not have the ability to repay the debt secured by the aircraft acquired, which means that title to the aircraft would likely be lost in a foreclosure proceeding. It should be noted that money drawn under the credit facility is secured by the Company's existing assets, as well as the assets acquired with each financing. A reduction in the number of aircraft in AeroCentury's portfolio would negatively impact operations.

Competitive Environment

The Company competes for customers, who generally are regional commercial aircraft operators that are seeking to lease aircraft under an operating lease, with other leasing companies, banks, financial institutions, and aircraft leasing partnerships. The competitive environment may increase if competitors who have traditionally neglected the regional air carrier market begin to focus on that market. In general, competition is largely based on price and lease terms, as well as the entry of new competitors into the market. In addition, those companies with greater access to capital markets could mean fewer acquisition opportunities for ACY and/or lease terms less favorable to the Company on new acquisitions, as well as renewals of existing leases or new leases of existing aircraft.

Shares Outstanding

ACY has a limited number of shares outstanding; therefore, any change in the top-line could dramatically impact bottom-line results. Based on the current fully diluted shares outstanding, a \$0.1 million change in net income would result in an approximate \$0.06 per share change in earnings per share.

Customer Concentration

The Company's first quarter 2008 10Q filing, stated that its five largest customers located in Mexico, Antigua, Netherlands Antilles, Sweden and Belgium, account for approximately 18%, 16%, 11%, 11%, and 10%, respectively, of the Company's monthly lease revenue.

Concentration of credit risk with respect to lease receivables will diminish in the future only if the Company is able to lease additional assets or re-lease assets currently on lease to significant customers to new customers.

To gain some perspective as to where the aircraft are leased, investors should note the following table:

Net Book Value of Aircraft and Aircraft Engines Held for Lease	As of December 31, 2007 (\$ millions)
Europe and United Kingdom	30.982
Caribbean	28.487
Central America	18.170
Asia	15.692
Off lease	9.294
United States	7.735
Africa	4.913
South America	3.651
Total	118.924

Source: 2007 10-K filing

The information above is based on the Company's portfolio of 41 aircraft as previously described.

Investment in New Aircraft Types

According to SEC filing, the Company has traditionally invested in a limited number of types of turboprop aircraft and engines. The SEC filings state that while Management intends to continue to focus solely on regional aircraft and engines, it recently acquired Fokker 100 regional jet aircraft, and may continue to seek acquisition opportunities for new types and models of regional jet and turboprop aircraft and engines used in the Company's targeted customer base of regional air carriers. Acquisition of other aircraft types and engines not previously acquired may entail greater ownership risk due a lack of experience managing those aircraft and engine types. However, ACY believes that JMC personnel's overall industry experience and its technical resources should permit the Company to effectively manage such new aircraft types and engines.

Economic Factors

The Company's business is dependent on the strength of the Travel and Transportation Industries and on the general level of global economic activity. In a May 2008 economic forecast by the Mortgage Bankers Association (a national association representing the real estate finance industry) calls for Gross Domestic Product (GDP) to grow at an annual rate of approximately 1.3% in 2008 and 2.7% in 2009, compared to GDP of 2.5% in 2007. During May 2008, NABE (an association of professionals who have an interest in business economics and who want to use the latest economic data and trends to enhance their ability to make sound business decisions) issued an outlook based on their survey of economists, which offered a GDP outlook for 2008 and 2009 of 1.2% and 2.7%, respectively. If the economic growth were to stall or go negative and energy prices were to continue at record high levels, it would likely impact the Travel and Aviation Industries, which in turn could negatively impact the Company's operations.

Leasing

Crucial to the Company's ability to regain profitability and grow revenues is its ability to successfully negotiate lease extensions and re-lease/remarket aircraft. However, factors that may negatively impact the Company's leasing operations include: 1) demand for leasing aircraft and/or the sale of an aircraft; 2) acceptable rates that an aircraft can be leased for; and 3) the cyclical nature of the Air Transportation and Travel Industries.

Reliance on JetFleet Management

AeroCentury relies on JetFleet Management Corp (JMC) to perform management functions under a management agreement. Currently, the agreement is in its eleventh year of a 20-year term. Under this agreement, the Company pays an asset-based management fee to JMC.

JMC is not a fiduciary to the Company or its stockholders. The Board of Directors, however, has ultimate control and supervisory responsibility over all aspects of the Company and owes fiduciary duties to the Company and its stockholders. It is important to note that the officers of JMC are also officers of the Company; therefore, if a dispute over obligations between the Company and JMC occurs, a conflict of interests may exist.

Insurance

The Company may be named in a suit claiming damages for injuries or damage to property caused by its assets. As a triple net lessor, the Company is generally protected against such claims. Additionally, the Company should have some protection through the United States Aviation Act with respect to its aircraft assets. The Company may carry insurance or require a lessee to insure against a risk, there may be certain cases where the loss is not entirely covered by the lessee or its insurance.

International Risks

The Company has focused on leases in overseas markets, which may present somewhat different risks than those with domestic lessees. Foreign laws, regulations and judicial procedures may be more or less protective of lessor rights than those which apply in the United States. Also, the Company could experience collection or repossession problems related to the enforcement of its lease agreements under foreign local laws and the remedies in foreign jurisdictions.

Stockholder Rights Plan

In April 1998, in connection with the adoption of a stockholder rights plan, the Company filed a Certificate of Designation detailing the rights, preferences and privileges of a new Series A Preferred Stock. Pursuant to the plan, the Company issued rights to its stockholders of record as of April 23, 1998, giving each stockholder the right to purchase one one-hundredth of a share of Series A Preferred Stock for each share of Common Stock held by the stockholder. Such rights are exercisable only under certain circumstances in connection with a proposed acquisition or merger of the Company.

Internal Controls

During the course of the Company's 2007 audit, its independent auditors identified and reported a material weakness in internal control over financial reporting at December 31, 2007 as it relates to ACY's incorrect accounting for end of lease lump-sum payments for two leases (originally entered into during December 2004). Management was aware of the lump-sum payment; however, upon further investigation found that their understanding of the nature of the payment was different than that of the lease provisions. The Company evaluated the errors in accordance with the quantitative and qualitative guidance set forth in SEC Staff Accounting Bulletin No. 99, "Materiality," and determined with the concurrence of its Audit Committee, that the Company's previous financial statements as issued were unreliable and, as a result, the 2006 annual and 2007 and 2006 interim financial statements were restated.

Management determined that this deficiency constituted a material weakness as of December 31, 2007. Also, it determined that the error was inadvertent and unintentional. Upon becoming aware of this issue, the Company initiated a review of its internal controls and processes with respect to lease revenue recognition. As a result, the Company concluded that its multi-level lease review process which focuses on and summarizes tax and GAAP issues for new and amended leases and which it instituted during the fourth quarter of 2007, prior to the discovery

of the error, was satisfactory to prevent recurrence of this type of error. Upon identification of the error, Management analyzed all leases that existed at December 31, 2007 and determined that lease revenue was being properly recognized. According to the Company's first quarter 2008 10Q filing that in accordance with SEC requirements, there has been no significant change in ACY's internal controls over financial reporting.

Shareholder Control

According to the Company's Form DEF 14A filing (on March 24, 2008), Neal Crispin, its Chairman, President, and Principal Stockholder and Toni Perazzo, its CFO and Senior Vice President of Finance (and wife of the Company's Chairman) combined control approximately 21.8% of AeroCentury Inc. common stock. Therefore, they are potentially able to significantly influence all matters requiring approval by stockholders, including the election of directors and significant corporate transactions.

Miscellaneous

The Company's financial results and equity values are subject to other risks and uncertainties known and unknown, including but not limited to competition, operations, financial markets, regulatory risk, and/or other events. These risks may cause actual results to differ from expected results.

Trading Volume

An equity specific concern relates to liquidity. Based on our calculations, during 2006, average daily-volume was 3,494 shares traded a day. However, during the 2007, average daily volume surged to 33,831 shares traded per day. During the first five months of 2008, average daily volume decreased to 13,362 shares a day. On a relative basis, volume for this equity is very small. Investors need to be aware that by nature, an equity that lacks liquidity can have significant price volatility.

Conclusion

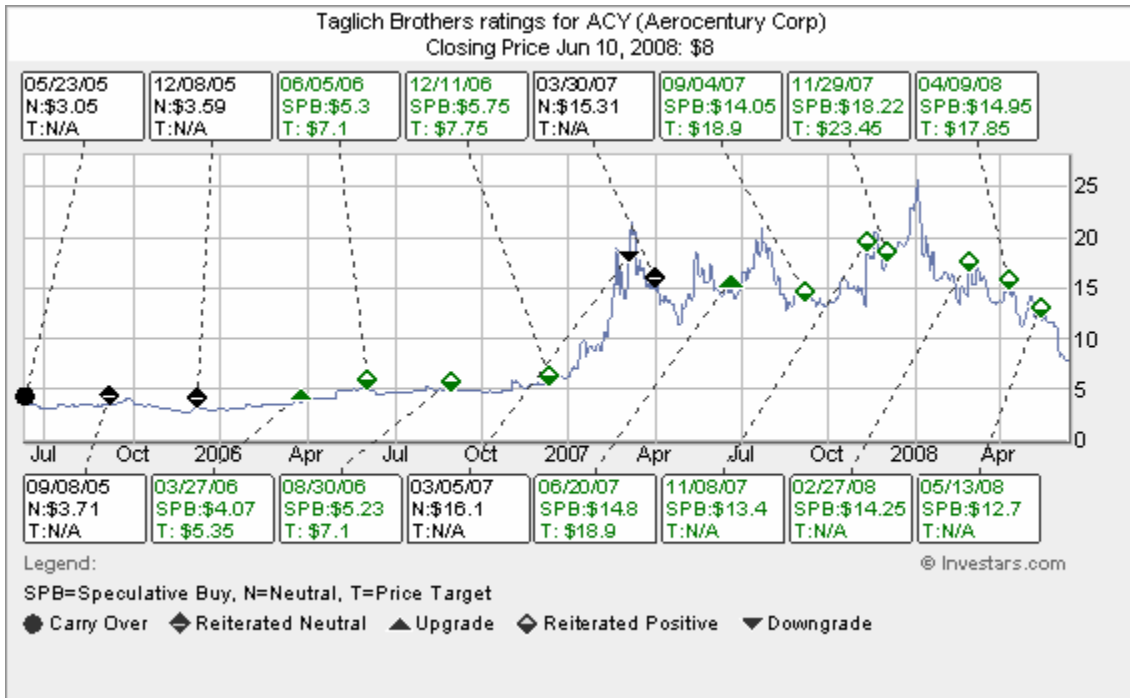

We are maintaining our Speculative Buy rating on the shares of AeroCentury (AMEX: ACY) and reducing slightly our twelve-month price target to \$14.35 per share from our prior twelve-month price target of \$17.85 per share. Our price target is based on a relative price to sales and price to earnings analysis relative to the Rental & Leasing Industry.

Management believes that reported net income may be subject to greater fluctuations from quarter-to-quarter as compared to historic results, based on the Company adopted AUG AIR-1 at the start of 2007 (maintenance reserves income revenue).

Our price target is derived using the following valuation models discounted by approximately 45% to account for Company specific and microcap risks:

- A 1.5X price to revenue multiple, which is the trailing twelve month multiple (as of June 9, 2008) for the Rental & Leasing Industry according to moneycentral.msn.com, applied to our operating lease revenue (rent income) per share estimate of \$14.68 for the next four quarters; and
- A 14.6X price to earnings multiple, which is the five year high multiple (as of June 9, 2008) for the Rental & Leasing Industry according to moneycentral.msn.com, applied to our earnings per share estimate of \$2.07 for the next four quarters.

Meaning of Ratings

Buy

We believe the Company is undervalued relative to its market and peers. We believe its risk reward ratio strongly advocates purchase of the stock relative to other stocks in the marketplace. Remember, with all equities there is always downside risk.

Speculative Buy

We believe that the long run prospects of the Company are positive. We believe its risk reward ratio advocates purchase of the stock. We feel the investment risk is higher than our typical “buy” recommendation. In the short run, the stock may be subject to high volatility and continue to trade at a discount to its market.

Neutral

We will remain neutral pending certain developments.

Underperform

We believe that the Company may be fairly valued based on its current status. Upside potential is limited relative to investment risk.

Sell

We believe that the Company is significantly overvalued based on its current status. The future of the Company's operations may be questionable and there is an extreme level of investment risk relative to reward.

Some notable Risks within the Microcap Market

Stocks in the Microcap segment of the market have many risks that are not as prevalent in Large-cap, Blue Chips or even Small-cap stocks. Often it is these risks that cause Microcap stocks to trade at discounts to their peers. The most common of these risks is liquidity risk, which is typically caused by small trading floats and very low trading volume which can lead to large spreads and high volatility in stock price. In addition, Microcaps tend to have significant company specific risks that contribute to lower valuations. Investors need to be aware of the higher probability of financial default and higher degree of financial distress inherent in the microcap segment of the market.

From time to time our analysts may choose to withhold or suspend a rating on a company. We continue to publish informational reports on such companies; however, they have no ratings or price targets. In general, we will not rate any company that has too much business or financial uncertainty for our analysts to form an investment conclusion, or that is currently in the process of being acquired.
