AeroCentury Corp., is engaged in the business of ownership, management, leasing and acquisition of aircraft. The primary focus is on used commercial turboprop aircraft equipment for lease to foreign and domestic regional air carriers.

Key investment considerations:

We are maintaining our Speculative Buy rating on shares of AeroCentury (AMEX: ACY) and twelve-month price target of \$7.10 per share. The price target is primarily based on our outlook for top and bottom line expectations for 2007.

During the second quarter of 2006, ACY re-leased three aircraft. One was re-leased to an existing customer and the other two were leased to a regional carrier in the United States. Also, the Company sold a Shorts SD 3-60 aircraft for a gain of approximately \$0.400 million.

AeroCentury reported second quarter 2006 total revenues of \$4.247 million versus \$2.755 million in the same period last year. Top line results were positively impacted by \$0.4 million gain from the sale of an aircraft. Net income for the quarter was \$0.086 million or \$0.06 per diluted share versus net income of \$0.046 million or \$0.03 per diluted share in the second quarter of 2005.

Based on first half results and the outlook provided by Management in public filings, we are adjusting our forecasts for 2006, to total revenue of \$18.085 million (includes a \$2.8 million gain) and net income of \$0.381 million or \$0.25 per share. Our prior forecasts called for total revenue of \$17.338 million (includes a \$2.4 million gain) and net income of \$0.433 million or \$0.28 per share. Investors should note that due to the extremely low share count (1.543 million) a \$0.100 million change in net income equals approximately a change of \$0.06 per diluted share.

Based on current operating trends, we are adjusting our forecasts for 2007 to total revenue of \$15.785 million and net income of \$0.432 million or \$0.28 per diluted share. Our prior forecasts called for total revenue of \$15.350 million and net income of \$0.500 million or \$0.32 per diluted share.

**Please view our disclaimer located on page 11.*

The Company

AeroCentury Corp. (AMEX: ACY), based in Burlingame, California, was formed in 1997. ACY is engaged in the business of ownership, management, leasing, and acquisition of turboprop aircraft and engines. The primary focus is on used commercial turboprop aircraft equipment for lease to foreign and domestic regional air carriers.

The Company's mission is to increase stockholder value by acquiring aircraft assets and managing those assets in order to provide a return on investment through lease revenue and the eventual sale of the asset. Management believes it can achieve the Company's mission by reinvesting cash flow, as well as successfully executing on asset selection, lessee selection, and obtaining acquisition financing.

Recent Financials

On August 10, 2006, AeroCentury reported second quarter 2006 total revenue of \$4.247 million versus \$2.755 million in the same period last year. Operating lease revenue (rent income) improved to \$3.834 million versus \$2.738 million in the second quarter of 2005. The positive change in operating lease revenue versus last year was primarily due to aircraft purchased beginning in April 2005. In addition, total revenue was positively impacted by a gain of \$0.409 million related to the sale of the Company's Shorts SD3-60 aircraft.

ACY reported that depreciation, management fees, G&A, and insurance expenses for the quarter increased by approximately \$0.331 million versus the second quarter of 2005. The increase was primarily due to the purchase of aircraft beginning in April 2005, which was offset to some degree by the sale of an aircraft in November 2005 and April 2006, lower accounting fees, and lower insurance expense. In addition, the Company also experienced higher interest expense (resulting from higher market interest rates and a higher average principal balance during the same period in 2005) of approximately \$0.434 million versus the second quarter of 2005.

Maintenance expenses increased by \$0.746 million compared to the same period last year, primarily due to the need to prepare several aircraft for re-lease.

Net income for quarter was \$0.086 million or \$0.06 per diluted share versus a net income of \$0.046 million or \$0.03 per diluted share in the first quarter of 2005.

In comparison, Taglich Brothers' estimates called for total revenue of \$3.725 million and net income of \$0.110 million or \$0.07 per diluted share.

Balance Sheet as of June 30, 2006

The Company provided the following balance sheet data:

- Total assets increased to \$96.082 million versus \$96.547 million at the end of 2005;
- Total liabilities decreased to \$76.902 million versus \$77.557 million at the end of 2005; and
- Shareholders' equity increased to \$19.181 million versus \$18.990 million at the end of 2005.

The Company ended the second quarter of 2006 with cash and cash equivalents of \$3.420 million versus \$0.618 million at December 31, 2005. Total outstanding notes payable and accrued interest declined slightly to \$57.108 million versus \$58.337 million at the end of fiscal 2005.

On November 10, 2005, an agreement was reached to renew the maturity date of the Company's \$50.0 million credit facility until October 31, 2007. In connection with the renewal of the facility, certain financial covenants were modified. The applicable margin will range between 275 to 325 basis points above LIBOR based on certain financial ratios. In May 2006, Bridge Bank, N.A. became a new member of the Company's credit facility, which resulted in the facility being increased to \$55.0 million from \$50.0 million. During the first six months of 2006, the Company repaid \$1.0 million of the outstanding principal under its credit facility. As of June 30, 2006, according to the Company's 10-Q filing, due to maintenance expense in connection with preparing one of the

Company's aircraft for lease it was out of compliance with a financial ratio covenant. Subsequently, ACY was able to obtain a waiver from its banks. ACY was in compliance with all other covenants and Management believes, at this time, based on its current projections, that ACY will be in compliance with all covenants related to the credit facility in future periods. At the end of quarter, \$48.996 million was outstanding under the credit facility.

Investors should be aware that during November 2005, the Company refinanced two DHC-8 aircraft that were part of its credit facility collateral base, using bank financing separate from its credit facility. The aircraft were transferred to AeroCentury V LLC, a special purpose LLC, which borrowed \$6.4 million at a fixed interest rate of 7.87% and is due November 10, 2008. The note is collateralized by the aircraft of this new non-recourse subsidiary (which means that if a default were to occur it would not impact ACY's base business). Repayments of this financing consists of monthly principal and interest payments through April 22, 2008, interest only from April 22, 2008 until the maturity date, and a balloon principal payment due at maturity. According to the second quarter 2006 10-Q filing, the balance of the note payable at June 30, 2006 was \$5.877 million and it was in compliance with all covenants related to this obligation.

In April 2006, the Company refinanced a note obligation for an aircraft previously owned by AeroCentury II LLC, using bank financing from another lender. The aircraft was transferred to AeroCentury VI LLC, a special purpose LLC, which borrowed \$1.650 million due October 15, 2009. The note bears interest at an adjustable rate of one-month LIBOR plus 3%. The note is collateralized by the aircraft and the Company's interest in AeroCentury VI LLC. Payments due under the note consist of monthly principal and interest through April 20, 2009, interest only from April 20, 2009 until the maturity date, and a balloon principal payment due on the maturity date. If the aircraft lease agreement is terminated on April 15, 2008 pursuant to a lessee early termination option, the note will be due October 15, 2008, and the interest only period will be from April 20, 2008 through October 15, 2008.

Management believes that the Company will have adequate cash flow to meet its ongoing operational needs, including required repayments under its credit facility. Their belief is based on each advance on its credit facility being able to fund a portion of a new acquisition of an asset subject to a lease with the lease revenue expected to be greater than the incremental increase in required for interest payments arising from the advance. However, future growth is likely to depend on the availability of such additional financing for acquisitions of leased assets.

Recent Developments

During the second quarter of 2006, the Company:

- Sold its Shorts SD3-60 aircraft resulting in a gain of approximately \$0.400 million;
- Re-leased a deHavilland DHC-8 aircraft to an existing customer for a term of 36 months; and
- Re-leased two Saab 340A aircraft which had been off-lease to a regional carrier in the U.S for terms of approximately two years.

Also of note, as of June 30, 2006, all of the Company's aircraft (33) were on lease. Only the Company's reserve turboprop engine was off lease.

Competitive Environment

The Company targets regional commercial aircraft operators that are seeking to lease aircraft under an operating lease. The competition in this market, which is primarily based on price and lease terms, comes from companies that offer financing, including leasing companies, banks and other financial institutions, and aircraft leasing partnerships. The large participants in the aircraft leasing industry include International Lease Finance Corp., a subsidiary of American International Group (NYSE: AIG), the CIT Group (NYSE: CIT), GE Capital Aviation Services, a subsidiary of General Electric Commercial Finance, and Willis Lease Finance Corp. (NasdaqNM: WLFC).

Impacting the leasing of aircraft for all industry participants had been relatively low interest rates which caused lease rates to decline upon the releasing of an aircraft. Since mid-2004, interest rates have trended higher as reflected by seventeen 25 basis points increases in interest rates, by the Federal Reserve. However, that may have come to an end in August 2006, when the Federal Reserve paused, its consecutive streak of interest rate hikes. Only time will tell whether the Federal Reserve will resume its previous 25 basis point increases in interest rates.

According to the Travel Industry Association of America (TIA), after years of little travel volume growth combined with significantly lower travel spending, 2005 was the year of recovery the industry has been awaiting. It was the first year since 2000 that all travel industry sectors experience increased demand. The TIA is reporting that overall traveler spending by domestic and international visitors increased by approximately 5.6% to \$633.5 billion in 2005, versus an estimated \$600.1 billion in 2004. The TIA is forecasting that number to increase by approximately 4.5% in 2006 to \$662 billion and 5.5% in 2007 to \$698.2 billion.

Projections and Outlook

Based on first half results, the outlook provided by Management in the Company's public filings, and general operating trends, we are adjusting our forecasts for 2006, to total revenue of \$18.085 million (which includes \$2.8 million gain from non-refundable maintenance reserves and gain on sale of aircraft). Our prior forecasts called for total revenue of \$17.338 million (which did not include the gain on sale of aircraft of \$0.409 million).

Based on our revised revenue forecast and the Company's cost structure during the first six months of 2006, we are adjusting our estimate for net income to \$0.381 million or \$0.25 per share versus our prior estimate, which called for net income of \$0.433 million or \$0.28 per diluted share. Investors should take note that ACY has a limited number of shares outstanding; therefore, a change of \$0.100 million to net income would result in an approximate \$0.06 per share change in earnings per share.

Our forecast for bottom line results includes the following:

- Interest expense increasing to \$5.101 million versus \$3.485 million in 2005;
- SG&A expenses, which includes insurance, remaining virtually flat at \$0.803 million versus \$0.826 million in 2005;
- Management fees and depreciation increasing to \$7.709 million versus \$6.371 million in 2005;
- Maintenance, impairment, and bad debt expenses of \$3.907 million versus \$2.479 million in 2005. In 2005, maintenance expense included approximately \$1.452 million due to the condition of two aircraft that were returned to the Company and the needed preparations to re-lease them. While 2006 included approximately \$2.553 million related to the retention of non-refundable maintenance reserves when two aircraft were returned to the Company at lease end; and
- A tax rate of 32.6%.

Given our adjusted 2006 estimates, we are revising our forecasts for 2007 based on the belief that the Company should be able to maintain a consistent operating trend. We are forecasting total revenue for 2007 of \$15.785 million and net income of \$0.432 million or \$0.28 per diluted share. Our prior forecasts called for total revenue of \$15.350 million and net income of \$0.500 million or \$0.32 per diluted share. It is important to note that our total revenue estimate for 2007 only consists of rent income as we are not forecasting any unusual events that might impact total top line results. Our forecast for bottom line results includes the following:

- Interest expense of \$5.525 million versus our estimate of \$5.101 million for 2006;
- SG&A expenses, which includes insurance, at \$0.873 million versus our estimate of \$0.803 million in 2006;
- Management fees and depreciation of \$7.870 million versus our estimate of \$7.709 million in 2006;

- Maintenance, impairment, and bad debt expenses of \$0.800 million versus our estimate of \$3.907 million in 2006. 2006 included approximately \$2.553 million related to the retention of non-refundable maintenance reserves when two aircraft were returned to the Company at lease end; and
- A tax rate of 40.0%.

Investors should be aware that if additional purchases of aircraft are made and the Company is able to re-lease aircraft on a consistent basis, revenues could exceed our expectations for 2006. Of particular note, during November 2005, the Company created a non-recourse special purpose subsidiary that refinanced two DHC-8 aircraft, which had been part of the collateral base for its credit facility. The \$6.4 million financing was provided by a separate bank at a fixed interest rate of 7.87%.

Also supporting our projections for the upcoming year should be ACY having a combination of thirty-three aircraft and one aircraft engine within its portfolio, as of June 30, 2006 all of the aircraft were on lease with the engine off lease. According to the Company's second quarter 10-Q filing, the next scheduled expiration of one of the Company's aircraft leases is in November 2006, and Management expects it will be extended at that time. Investors should be aware that if any of leases are not renewed, the Company may be required to make principal repayments under its credit facility due to collateral base covenant restrictions.

In general the specific timing of when aircraft(s) will be returned to the Company remains unclear; however, until an aircraft is returned, rent will be paid by the lessor even if the lease term has expired. In order to obtain re-lease agreements, Management continues to focus its efforts on marketing. In addition, the lessee for two aircraft has given the Company indications that it will return one and extend the lease for the other.

Risks

Credit Facility Renewal

In November 2004, the Company reached agreement with its lenders to renew its credit facility through October 31, 2005. The renewal agreement also revised certain pricing and covenant provisions and waived compliance with two covenants at September 30, 2004. As part of the renewal, the LIBOR margin was set at 375 basis points through March 2005, after which a margin of 275 to 375 basis points will be determined by certain financial ratios.

According to the Company's October 31, 2005, 8-K filing it obtained an extension of its credit facility until November 9, 2005. Subsequently, the Company reached an agreement with its lenders to renew the maturity date of the facility to October 31, 2007. This two year renewal should allow the Management to focus on building its aircraft portfolio over the next two years.

At the end of the second quarter of 2006, \$48.996 million was outstanding under the Company's \$55 million credit facility, which means that Management may need to either expand the facility or continue to use special purpose financing in order to increase its aircraft portfolio. As of June 30, 2006, according to the Company's 10-Q filing, due to maintenance expense in connection with preparing one of the Company's aircraft for lease it was out of compliance with a financial ratio covenant. Subsequently, ACY was able to obtain a waiver from its banks. ACY was in compliance with all other covenants and Management believes, at this time, based on its current projections, that ACY will be in compliance with all covenants related to the credit facility in future periods.

On May 17, 2006, ACY announced that Bridge Bank, N.A. became a new member of the Company's credit facility, which resulted in the facility being increased to \$55.0 million from \$50.0 million.

Special Purpose Financing

The Company owns one deHavilland DHC-8 aircraft that is held in a special purpose subsidiary entity and financed by a lender separate from the credit facility. A balloon principal payment was due during April 2006. The obligation was refinanced and the \$1.650 million is due October 15, 2009. The note bears interest at an adjustable rate of one-month LIBOR plus 3%.

During November 2005, the Company refinanced two DHC-8 aircraft using bank financing separate from its credit facility. The aircraft were transferred to a special purpose LLC, which borrowed \$6.4 million, due November 10, 2008. The note is collateralized by the aircraft. Payments consist of monthly principal and interest through April 22, 2008, and interest only from April 22, 2008 until the maturity date, when a balloon principal payment is due.

In general, the availability of special purpose financing in the future will depend on:

- The availability of funds to be used for the equity portion of the financing;
- The type of asset being financed;
- The creditworthiness of the underlying lessee; and
- Continued compliance with certain of the Company's credit facility covenants.

Debt Financing

The Company uses its revolving credit facility and special purpose financing to acquire aircraft in order to lease it to a customer. If a customer is unable to make its lease payments (for example, the repossession of aircraft from a Haitian lessee), AeroCentury may not have the ability to repay the debt secured by the aircraft acquired, which means that title to the aircraft would likely be lost in a foreclosure proceeding. It should be noted that money drawn under the credit facility is secured by the Company's existing assets, as well as the assets acquired with each financing. A reduction in the number of aircraft in AeroCentury's portfolio would negatively impact operations.

Competitive Environment

The Company competes for customers, who generally are regional commercial aircraft operators that are seeking to lease aircraft under an operating lease, with other leasing companies, banks, financial institutions, and aircraft leasing partnerships. The competitive environment may increase if competitors who have traditionally neglected the regional air carrier market begin to focus on that market. In general, competition is largely based on price and lease terms, as well as the entry of new competitors into the market. In addition, those companies with greater access to capital markets could mean fewer acquisition opportunities for ACY and/or lease terms less favorable to the Company on new acquisitions, as well as renewals of existing leases or new leases of existing aircraft.

Shares Outstanding

ACY has a limited number of shares outstanding; therefore, any change in the top-line could dramatically impact bottom-line results. Based on the current fully diluted shares outstanding, a \$0.1 million change in net income would result in an approximate \$0.06 per share change in earnings per share.

Customer Concentration

For the year ended December 31, 2005, the Company had three significant customers, which accounted for 34%, 14%, and 12%, respectively, of lease revenue. The Company's second quarter 10-Q filing stated that its five largest customers are located in Belgium, Taiwan, the Caribbean, Norway, and Sweden, and account for approximately 15%, 13%, 12%, 11%, and 10%, respectively, of the Company's monthly lease revenue. Concentration of credit risk with respect to lease receivables will diminish in the future only if the Company is able to lease additional assets or re-lease assets currently on lease to significant customers to new customers.

Economic Factors

The Company's business is dependent on the strength of the Travel and Transportation Industries and on the general level of global economic activity. As a result of the weak economic environment experienced between the middle of 2000 to the middle of 2003, there was a reduction in the number of aircraft being used by major air carriers, particularly those serving the United States Market. AeroCentury's current leases and remarketing

efforts are primarily focused outside of the U.S.; therefore, the impact was somewhat muted. An August 2006 economic forecast by the Mortgage Bankers Association (is a national association representing the real estate finance industry) calls for Gross Domestic Product (GDP) to grow at an annual rate of approximately 3.4% in 2006 and 2.9% in 2007. In addition, the Federal Reserve had raised interest rates (by 0.25 basis points) seventeen times since mid 2004, in order to moderate future economic growth. In its August 2006 meeting the Federal Reserve paused and did not raise interest rates. If the economic growth were to stall or slow due to unforeseen events (such as hurricanes and terror attacks) it would likely impact the Travel and Aviation Industries, which in turn could negatively impact the Company's operations.

Leasing

Crucial to the Company's ability to regain profitability and grow revenues is its ability to successfully negotiate lease extensions and re-lease/remarket aircraft. However, factors that may negatively impact the Company's leasing operations include: 1) demand for leasing aircraft and/or the sale of an aircraft; 2) acceptable rates that an aircraft can be leased for; and 3) the cyclical nature of the Air Transportation and Travel Industries.

Reliance on JetFleet Management

AeroCentury relies on JetFleet Management Corp (JMC) to perform management functions under a management agreement. Currently, the agreement is in its ninth year of a 20-year term. Under this agreement, the Company pays an asset-based management fee to JMC.

JMC is not a fiduciary to the Company or its stockholders. The Board of Directors, however, has ultimate control and supervisory responsibility over all aspects of the Company and owes fiduciary duties to the Company and its stockholders. It is important to note that the officers of JMC are also officers of the Company; therefore, if a dispute over obligations between the Company and JMC occurs, a conflict of interests may exist.

Insurance

The Company may be named in a suit claiming damages for injuries or damage to property caused by its assets. As a triple net lessor, the Company is generally protected against such claims. Additionally, the Company should have some protection through the United States Aviation Act with respect to its aircraft assets. The Company may carry insurance or require a lessee to insure against a risk, there may be certain cases where the loss is not entirely covered by the lessee or its insurance.

Interest Rates

If interest rates were to increase sharply, the Company's near-term operations would likely be negatively impacted in terms of the borrowing required to finance the purchase of assets (i.e. aircraft, engines, etc.). Higher lease rates would over the long-term mitigate the impact of a rapid rise in interest rates.

Valuation Adjustments

The Company continually reviews its asset valuations. It did not make any valuation adjustments during 2003 or 2005. However, in 2004 the Company incurred an impairment charge of \$0.463 million related to one of its leased aircraft. It is important to be aware that any future adjustments, if necessary, would negatively impact future financial results and the collateral available for ACY's credit facility.

Miscellaneous

The Company's financial results and equity values are subject to other risks and uncertainties known and unknown, including but not limited to competition, operations, financial markets, regulatory risk, and/or other events. These risks may cause actual results to differ from expected results.

Trading Volume

An equity specific concern relates to liquidity. Based on our calculations, average daily-volume for 2004 decreased to 1,261 from 2,660 shares in 2003. Average daily-volume for 2005 increased to 10,992 shares traded a day. During the first seven months of 2006, average daily-volume decreased to 3,371 shares traded a day. On a

relative basis, volume for this equity is very small. Investors need to be aware that by nature, an equity that lacks liquidity can have significant price volatility.

Conclusion

We are maintaining our Speculative Buy rating on shares of AeroCentury (AMEX: ACY) and twelve-month price target of \$7.10 per share.

Our rating is based on the Company's ability to:

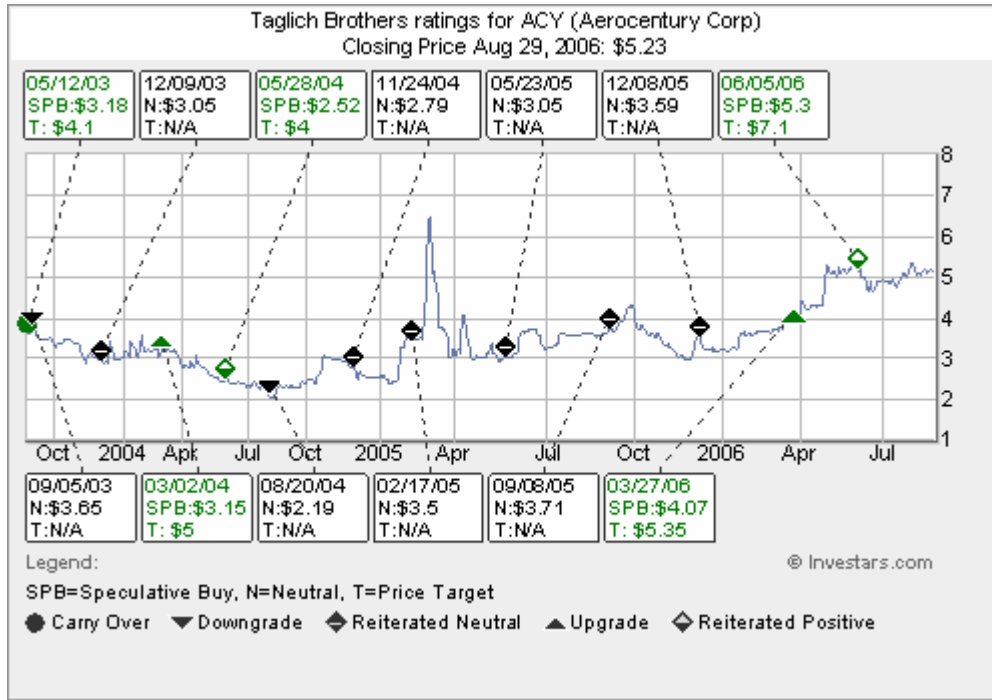

- Extend the maturity date of its credit facility to October 31, 2007;
- Obtain additional financing through the creation of a special purpose subsidiary, as well as adding a new bank to its credit facility which increased the facility by \$5.0 million to \$55.0 million; and
- Generate fairly consistent top and bottom line results.

Our price target is derived using the following valuation models discounted by 25% to account for Company specific and microcap risks:

- A 1.00X price to revenue multiple, which is the trailing twelve month multiple (as of August 25, 2006) for a public competitor, Willis Lease Finance Corp. (NasdaqGM: WLFC), applied to our revenue per share estimate of \$10.23 for 2007;
- A 39.9X price to earnings multiple, which is the trailing twelve month multiple (as of August 25, 2006) for Willis Lease Finance Corp., applied to our earnings per share estimate of \$0.28 for 2007; and
- A 0.59X price to book multiple (as of August 25, 2006) for Willis Lease Finance Corp., applied to ACY current book value of \$11.94 per share.

Investors should be aware that it is still likely that additional financing will be sought to continue building the aircraft portfolio, which has the potential to negatively impact future operations depending on the overall interest rate environment.

AeroCentury Inc.

Taglich Brothers Current Ratings Distribution

Meaning of Ratings

Buy

We believe the Company is undervalued relative to its market and peers. We believe its risk reward ratio strongly advocates purchase of the stock relative to other stocks in the marketplace. Remember, with all equities there is always downside risk.

Speculative Buy

We believe that the long run prospects of the Company are positive. We believe its risk reward ratio advocates purchase of the stock. We feel the investment risk is higher than our typical “buy” recommendation. In the short run, the stock may be subject to high volatility and continue to trade at a discount to its market.

Neutral

We will remain neutral pending certain developments.

Underperform

We believe that the Company may be fairly valued based on its current status. Upside potential is limited relative to investment risk.

Sell

We believe that the Company is significantly overvalued based on its current status. The future of the Company's operations may be questionable and there is an extreme level of investment risk relative to reward.

Some notable Risks within the Microcap Market

Stocks in the Microcap segment of the market have many risks that are not as prevalent in Large-cap, Blue Chips or even Small-cap stocks. Often it is these risks that cause Microcap stocks to trade at discounts to their peers. The most common of these risks is liquidity risk, which is typically caused by small trading floats and very low trading volume which can lead to large spreads and high volatility in stock price. In addition, Microcaps tend to have significant company specific risks that contribute to lower valuations. Investors need to be aware of the higher probability of financial default and higher degree of financial distress inherent in the microcap segment of the market.

From time to time our analysts may choose to withhold or suspend a rating on a company. We continue to publish informational reports on such companies; however, they have no ratings or price targets. In general, we will not rate any company that has too much business or financial uncertainty for our analysts to form an investment conclusion, or that is currently in the process of being acquired.
